

Prince Kumar

princebaghal637@gmail.com | 8279349006 | LinkedIn : Prince Kumar | Github : Ranaprince19

Professional Summary

Full-stack developer with strong experience in building scalable web applications, AI-powered systems, and data-driven platforms. Proficient in React.js, Node.js, Python, and REST APIs, with hands-on experience in machine learning, real-time analytics, and workflow automation. Passionate about developing efficient, high-impact software solutions and solving real-world problems through technology.

Technical Skills

Programming: Python, JavaScript, SQL, C/C++

Web Development: React.js, Node.js, Express.js, REST APIs

Data & Analytics: Pandas, NumPy, Data Analysis, Feature Engineering, Data Visualization

Machine Learning & AI: Scikit-learn, TensorFlow, PyTorch, NLP, OpenCV

Tools & Platforms: Git, Linux, Firebase

Concepts: Data Structures & Algorithms, System Design Basics, API Development, Workflow Automation

Experience

iOS Developer Intern — Infosys, Mysore Mar 2026 – Present

- Built and integrated REST APIs using Python to automate workflows, improving system efficiency and reducing manual errors.
- Designed data validation and processing pipelines to ensure reliable and real-time system performance.
- Collaborated with cross-functional teams to identify bottlenecks and deliver scalable software solutions.

Research Intern — IIIT Delhi, India Jun 2025 – Aug 2025

- Processed and analyzed large-scale datasets to identify anomalies and improve system reliability.
- Built scalable data pipelines using **Python**, **Qiskit**, **Scikit-learn** for efficient data processing and model development.
- Optimized machine learning models to improve prediction accuracy and performance.

Quantum Software Intern — Quentangle (India-UK) Feb 2025 – Nov 2025

- Developed high-performance solutions using **C/C++** and **Python** to improve system efficiency and scalability.
- Designed benchmarking systems to evaluate and optimize application performance.
- Automated workflows to enhance system scalability and reduce manual intervention.

Research Intern — Deep Learning & Computer Vision Jan 2025 – Dec 2025 *Wrist Implant Identification (UK Collaboration)*

- Developed data pipelines for medical image processing, improving accuracy and system efficiency.
- Automated preprocessing and feature extraction workflows to enhance deep learning model performance.
- Contributed to research accepted at the **British Orthopaedic Association Congress 2025**.

iOS App Developer Intern — SRM Institute of Science and Technology Aug 2025 – Present

- Developed mobile applications with REST API integration for real-time data interaction.
- Improved application performance and optimized data handling for scalable and reliable system behavior.

Education

SRM Institute of Science and Technology 2023 – 2028
M.Tech (Integrated) in Computer Science and Engineering | **CGPA: 9.55** Kattankulathur, Tamil Nadu

Projects

KubeSight — Real-Time Monitoring & Failure Detection Platform GitHub

- Developed a scalable monitoring system to detect anomalies and improve reliability in distributed environments.
- Built real-time analytics and alert pipelines for proactive failure detection and reduced system downtime.
- Designed dashboards for performance tracking and system insights.
- **Selected among Top 5 teams out of 500+ participants (Guidewire DevTrails Hackathon).**

EthernaMed — AI Healthcare Decision Support System GitHub

- Developed an AI-powered system for symptom analysis and healthcare recommendations.
- Built backend services using **Python, Flask, REST APIs** for real-time processing and data handling.
- Designed scalable data pipelines to ensure efficient and reliable system performance.

Attrition360 — Employee Analytics & Workforce Intelligence System GitHub

- Built an analytics platform to identify employee attrition patterns and support workforce planning.
- Performed data preprocessing and feature engineering to improve model accuracy.
- Developed interactive dashboards using **Streamlit** for visualization and insights.

WanderReads — Mobile Application with REST API Integration GitHub

- Developed a mobile application with REST API integration for real-time data interaction.
- Improved application performance and optimized data handling for scalability.
- Designed modular architecture to enhance maintainability and system efficiency.

Achievements & Hackathons

Guidewire DevTrails Hackathon 2025 — Top 5 Finalist Certificate

Developed **KubeSight**, a data-driven system to improve monitoring and operational efficiency by enabling proactive failure detection. Recognized among the **Top 5 teams out of 500+ participants**.

Quantathon 2.0 — Winner (Quantum ML Track) Certificate

Designed optimized data-driven models and workflows, achieving top rank by outperforming **20+ teams**. Demonstrated strong problem-solving and analytical capabilities in complex scenarios.

Great Bangalore Hackathon 2025 — Top 50 Certificate

Developed a multilingual solution to improve user interaction and accessibility through real-time data processing and workflow integration across platforms.

Professional Membership

CSI Student Membership ID-99916533	Jan 2024 – Present
